Summary

As the CEO and Co-Founder of KUWA Innovations, I am passionate about nurturing, developing, and facilitating creativity and innovation in children and youth. I lead the organization's strategy and vision, which aims to empower the next generation of problem-solvers and change-makers in the ultra-poor communities.

I am also an aspiring software engineer, currently undertaking professional software training under ALX scholarships. I have completed multiple courses and certifications in Salesforce, cybersecurity, artificial intelligence, and project management, and I am eager to apply my skills and knowledge in developing solutions that will impact the world. My goal is to become a certified programmer, product design specialist, and user experience and interface expert.
